

FOR IMMEDIATE RELEASE:

Local Orthodontist Receives Honors at Recent SureSmile® Conference

Albert Lea, Minnesota (March, 2009) - Dr. Dean Leonard, a local SureSmile® provider, received a prestigious award for excellence at the recent SureSmile® User's Meeting. The meeting, sponsored by parent company OraMetrix, took place in San Diego, California from February 26- 28, 2009 and focused on best practices and new techniques for utilizing SureSmile® technology.

Dr. Leonard introduced the SureSmile® System to his patients and community in September 2006 and has since been focused on advancing his SureSmile® education in order to provide patients with greater ease of treatment and a superior smile result. As a dedicated SureSmile® provider, he is proud to accept this award for excellence and is pleased to offer his expertise and SureSmile's® state-of-the-art orthodontic technology to new and prospective patients.

The SureSmile® Orthodontic System is an advanced method for smile enhancement, which has been proven in clinical studies to offer less physical discomfort and reduced treatment times for patients. The system works through the use of state-of-the-art computerized imaging and treatment plan modeling, along with advanced robotic archwire bending. The specificity of computerized archwire placement serves to offer more precise tooth movement than can be achieved with traditional braces. Teeth are moved more directly into their target positions, thereby decreasing the number of wire changes and adjustments for patients.

Dr. Dean Leonard specializes in complete smile correction for both children and adults. He is proud to have been honored at the SureSmile® User's Meeting and has returned to the area with new insights and enthusiasm, which are certain to benefit his patients and community.

Dr. Leonard invites patients to visit his office, located at 1651 West Main Street, Skyline Plaza, Albert Lea, MN or call 507-377-0222 to inquire about SureSmile® and to schedule a complimentary consultation appointment. Prospective patients may also visit the SureSmile® website at www.suresmile.com to learn more about this advanced orthodontic treatment method, designed to provide superior smile enhancement quickly and conveniently. Dr. Leonard looks forward to utilizing his SureSmile® knowledge to offer patients a superior treatment experience and excellent results.
